BOLD MOVES

UNICELL®

Unicell® ClassiCube

Unicell®'s classically designed hi-cube body is the all-purpose solution to parcel delivery and trade vocations. Lengths range from 10' to 17' with many different heights to suit. Two widths are available for dual and single rear wheel applications. Endless

optional equipment choices make this the most versatile and adaptable body available for E-350 and E-450 Super Duty® Cutaway Vans.

Aerocell

Save fuel, reduce wind noise, and increase driver comfort and satisfaction with Unicell®'s flagship Aerocell van body. Lengths range from 12' to 17' with two height choices. Many options are available to suit a wide variety of applications for E-350 and E-450 Super Duty® Cutaway Vans.

Aerocell SRW

When a cargo van just isn't big enough, the next step is the Aerocell SRW. With a roomy 6'5" interior height and enough width to take two rows of shelves and still slide sheets of plywood in-between, it's no wonder that contractors are making the switch. New double

swing-out doors give you a second choice for rear access. Suitable for E-350 Super Duty® single rear wheel Cutaway Vans.

Unicell® Dry Freight

The most practical body in today's industry, the low-maintenance Dry Freight, beautifully shows off company graphics, is easy to repair, and is built tough enough for heavy loads without increased weight. Available in lengths from 10' - 24' and heights and options to suit any application. The new Ford LCF tilt cab is available through Unicell®'s Pool Chassis Inventory.

Truck Equipment

Plows, stake bodies, dump bodies, service bodies and lift-gates top the list of the many truck bodies and equipment available through Unicell®'s Truck Equipment Division.
